

Engineering Change Management[®]

For Microsoft Dynamics NAV

Who Approved That Change?

Not only will you know who approved the change, you will know why the change was requested in the first place. Change Notice, Change Request, and Change Order all follow industry standards for Bill of Material Management. Don't let your BOM get changed without a supporting Approved Document.

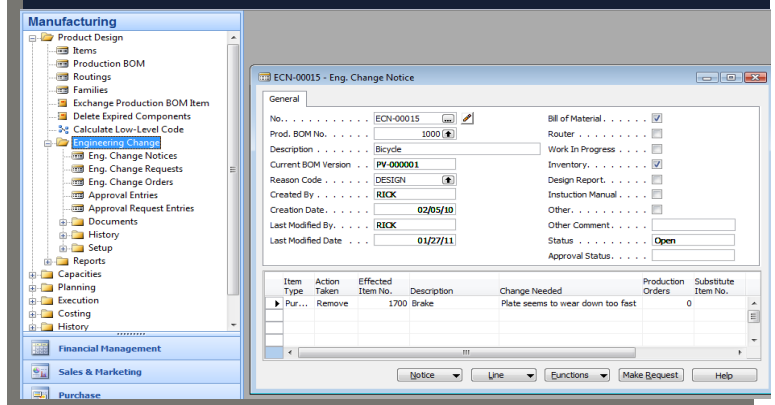

Benefits:

- Organize your Changes in a logical fashion
- Document who approved the changes
- Document the reason for the change in the comments
- Always see the "Status" of each Step
- Track the Creation, Modification, and Implementation Date
- Easily change the Status of Notices, Requests, and Orders
- Keep complete history of the approval process.

Engineering Change Mgmt.

A simple three step process that brings Microsoft Dynamics NAV the ability to: Notify the departments that a Change is needed; Send a Request for the change; and Execute the Change in the BOM.
