Job Enhanced Overhead®

For Microsoft Dynamics NAV

Plan Ahead, Save Profitability

In the normal processing of expenses you receive payable invoices for expenses that are not Job specific costs. You process them without job numbers. However, you wish to post some additional costs to jobs that simulates the overhead cost based on some formulas (ie. percentage of the other actual labor and material costs).

As you post "Actual Cost" in the Job Journal, Purchase Order, Purchase Invoice, and Time Journal the Overhead Granule will add an additional "overhead" cost entry based on the pre-defined & desired additional Percentage or Fixed Amount in the setup of the Overhead Rate Tables.
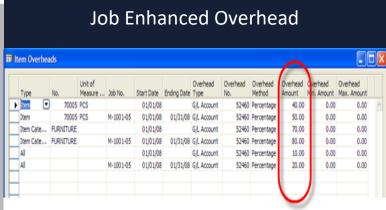

Key Benefits:

- Automatically Capture Administration Overhead on Jobs
- Build Estimated Overhead Costs In To Job Estimates
- Increase Margin with more accurate Quoting
- Flexibility on Rates for People, Machines, Material and other Expenses
- Easy to track and audit Overhead Entries

Job Enhanced Overhead

Job Enhanced Overhead is designed to make automatic Job Ledger Entries for "Overhead" that is pre-assigned to Items, Resources, or General Ledger Account. View a clear audit of how each Over Head Entry was made.
