

# Word Wrap Comments®

Removing Limitations.

For Microsoft Dynamics NAV

## Word Wrap Comments

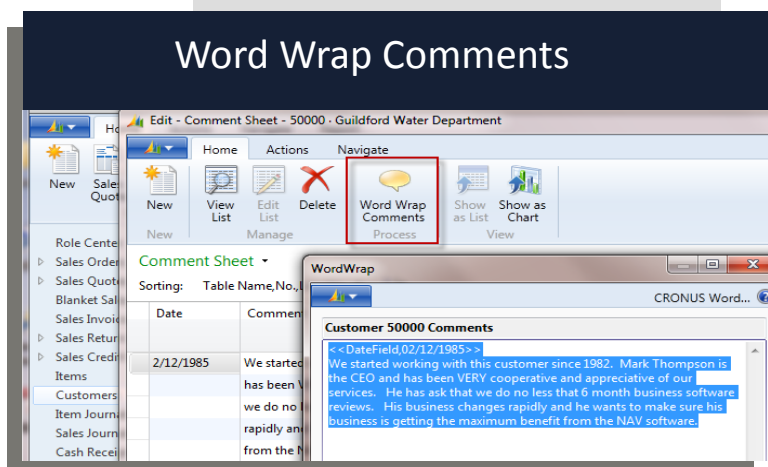

Word Wrap Comments is a Free Form editor that pops up on demand. Existing comments are brought forward into the Editor, and then you can add additional comments in a free form entry screen. When finished typing, simply hit the “OK” button and the new text is inserted into the Navision Comment box. Works great with “Copy” and “Paste” to clipboard, too. Word Wrap Comments are also available from a Document’s Lines.

## Key Benefits:

- Easy to quickly type comments into NAV.
- Simple to add, edit, or delete text as needed.
- Functionality is comparable to a word processor document.
- Freely type any text and it will return it to NAV in a split format as needed
- Add to any comment field onto the system on major cards, such as Vendor, Job, etc.

## Typical Issues

Without the help of “Word Wrap Comments”, users typically find it difficult to edit block descriptions. There are Character Limits on Custom Descriptions and the user cannot cut & paste to lines. Word Wrap Comments makes it quick to enter comments.
